|                         | 33 Ubi Avenue 3   |                           |  |  |
|                         | #07-51 Vertex   |                           |  |  |
|                         | Singapore 408868  |                           |  |  |
| Telephone               | 65-6634 0600  |                           |  |  |
| Fax                     | 65-6634 0900  |                           |  |  |
| Section 2               | Composition and Ingredients   |                           |  |  |
| <u>Components</u>       | <u>CAS No</u>   | <u>Approx. %</u>          |  |  |
| Petroleum distillates   | May include some or all of these: 70 -80  |                           |  |  |
|                         | 64741-88-4, 64741-89-5, 64742-01-4,<br>64742-54-7, 64742-65-0, 64742-94-5   |                           |  |  |
| Proprietary ingredients | Mixtures which may include some or all of   | these: 8 - 21             |  |  |
|                         | 25038-36-2,68648-42-3,63449-39-8  | 0 21                      |  |  |
| Zinc or zinc compounds  | May include 68649-42-3  | 0-2                       |  |  |
|                         | The chemical identity of some or all of the above ingredients is confidential informati   |                           |  |  |
|                         | and may be withheld as permitted under 29CFR 1910.1200.   |                           |  |  |
|                         | All the components of this material are listed on the TSCA Chemical Substances  |                           |  |  |
|                         | Inventory.  |                           |  |  |

| Section 3                         | Hazards Identification   |  |
|-----------------------------------|--|--|
| Major route(s) of entry           | Skin contact.  |  |
| Inhalation                        | No significant adverse health effects are expected to occur upon short-term exposure. At elevated temperatures, and/or in enclosed spaces, product mist or vapors may irritate the mucous membranes of the nose, throat, bronchi and lungs.  |  |
| Skin contact                      | This material can cause skin irritation from prolonged or repeated contact.<br>Injection under the skin can cause inflammation and swelling. Injection of<br>pressurised hydrocarbons can cause severe permanent tissue damage. Initial<br>symptoms may be minor. Injection of petroleum hydrocarbons requires<br>immediate medical attention.   |  |
| Eye contact                       | This product can cause transient mild eye irritation with short-term contact with liquid sprays or mists. Symptoms include stinging, watering, redness and swelling.   |  |
| Ingestion                         | If swallowed, large volumes of material can cause generalized depression,<br>headache, drowsiness, nausea, vomiting and diarrhea. Smaller doses can<br>cause a laxative effect. If aspirated into the lungs, liquid can cause lung<br>damage.  |  |
| Chronic Health<br>Effects Summary | This product contains a petroleum-based mineral oil. Prolonged or repeated<br>skin contact can cause mild irritation and inflammation characterized by<br>drying, cracking, (dermatitis) or oil acne. Repeated or prolonged inhalation of<br>petroleum-based mineral oil mists at concentration above applicable work-<br>place exposure levels can cause respiratory irritation or other pulmonary<br>effects.  |  |
| Conditions aggravated             | Disorders of the following organs or organ systems that may be aggravated  |  |
| by Exposure                       | by significant exposure to this material or its components include:  |  |
| Target Organs                     | This material may cause damage to the following organs:  |  |
| Carcinogen                        | This product is not known to contain any component at concentration above 0.1% which are considered carcinogenic by OSHA, IARC or NTP.   |  |
| Section 4<br>Eyes                 | <b>First Aid Measures</b><br>Check for and remove contact lenses. Flush eyes immediately with fresh<br>water for several minutes while holding the eyelids open. If irritation persist,<br>see a doctor.   |  |
| Skin                              | If burned by hot material, cool skin by quenching with large amount of cold water.<br>shoes and clothing. Wipe off excess material. Wash exposed skin with mild<br>soap and water. Seek medical attention if tissue appears damaged or pain/<br>irritation persists. Thoroughly clean contaminated clothing before reuse.<br>Discard contaminated leather goods. If material is injected under the skin, seek<br>medical attention immediately.                            |  |
| Ingestion                         | Do not induce vomiting except on advice of medical personnel. Do not give<br>anything to drink unless directed by a physician. Never give anything by<br>mouth to a person who is not fully conscious. If significant amounts are<br>swallowed or irritation or discomfort occurs, seek medical help immediately.  |  |
| Inhalation                        | Vaporization is not expected at ambient temperatures. This material is not expected to cause inhalation-related disorders under anticipated conditions of use. In case of overexposure, move the person to fresh air.  |  |
| Notes to Physician                | Treatment should be controlled by symptoms and clinical conditions. Emesis<br>maybe induced under medical supervision. In general, emesis induction is<br>unnecessary in such high viscosity, low volatility product.<br>SKIN: In the event of injection in underlying tissue, immediate treatment<br>should include extensive incision, debridement, and saline irrigation.<br>Inadequate treatment can result in ischemia and gangrene. Early symptoms<br>maybe minimal. |  |

| Section 5                        | Fire Fighting Measures  |  |
|----------------------------------|---|--|
| Flammability                     | NFPA Class-IIIB combustible material  |  |
| Classification                   |   |  |
| Auto Ignition Temp.              | Not available   |  |
| Flammable limits                 | Not determined  |  |
| Flash Point, °C                  | > 200°C (COC)   |  |
| Extinguishing Media              | Use water fog, dry chemical, foam or carbon dioxide type. Water or foam may cause frothing. Use water to cool fire-exposed containers. If a spill or leak has not ignited, use water spray to disperse the vapour and provide protection to personnel attempting to stop the leak.  |  |
| Explosion / Fire<br>Hazards      | For fires involving this material, do not enter any enclosed or confined space without self-contained breathing apparatus to protect against the hazardous effects of combustion products or oxygen deficiency.   |  |
| Hazardous Combustion<br>Products | Carbon dioxide, carbon monoxide, smoke, fumes, unburned hydrocarbons and trace oxides of sulphur and/or nitrogen.   |  |
| Section 6                        | Accidental Release Measures   |  |
| In case of Spill                 | Stop the source of leak or release and contain spill if possible. Ventilate the area. Use respirator and protective clothing as discussed in this MSDS. Collect with absorbent material and place in appropriate, labeled containers for disposal, or if permitted, flush spilled area with water.  |  |
| Section 7                        | Handling and Storage  |  |
| Handling                         | Avoid contamination and extreme temperatures to minimize product degradtion. Empty containers may contain product residues that can ignite with explosive force. Do not pressurize, cut, weld, braze, solder, drill or grind containers. Do not expose product containers to flames, spark, heat or other potential ignition sources.   |  |
| Storage                          | Keep containers closed. Do not store with strong oxidizing agents. Do not<br>store at elevated temperatures. Avoid storing in direct sunlight for extended<br>periods of time. Consult appropriate federal, state or local authorities before<br>reusing, reconditioning, reclaiming, recycling or disposing of empty containers<br>and/or waste residues of this product.                    |  |
| Section 8                        | Exposure Controls / Personal Protection   |  |
| Ventilation                      | Use general ventilation or local exhaust as required to maintain exposures below the occupational exposure limits.  |  |
| Eyes                             | Avoid eye contact. The wearing of chemical safety goggles or face shield is recommended. Have suitable ear wash water available.  |  |
| Skin                             | Exposed personnel should exercise reasonable personal cleanliness; this includes cleansing exposed area several times daily with soap and water, and laundering or dry cleaning soiled work clothing at least weekly. Safety shower is recommended near the work station.   |  |
| Inhalation                       | Respiratory protection is normally not required. However, if operating conditions create airborne concentrations, which exceed the recommended exposure standard(s), the use of an approved respirator is recommended.  |  |
| Hand Protection                  | Use gloves of chemical resistant materials such as neoprene or heavy nitrile<br>rubber or appropriate barrier cream with prolonged or repeated contact. If the<br>product is processed or handled at elevated temperatures, protect against<br>thermal burns by using heat-resistant (insulated) gloves. Do not wear gloves<br>or loose fitting clothing around rotating or moving equipment. |  |
| Clothing<br>Recommendations      | Long sleeve shirt is recommended. Wear a chemically protective apron if available. Do not wear rings, watches, or similar apparel that could entrap the material and cause a skin reaction.   |  |

| Exposure limits                        | Oil mist, mineral   | ACGIH TLV (USA)  |
|--|---|--|
|  | On mist, mineral  | TWA: 5 mg/m <sup>3</sup> 8 hrs   |
|  |   | STEL: 10 mg/m <sup>3</sup> 15 minutes  |
|  |   | OSHA PEL (USA)   |
|  |   | TWA: 5 mg/m <sup>3</sup> 8 hrs   |
| Section 9                              | Physical and Chemic   | al Properties (Typical)  |
